

HIWIN[®]
Motion Control and System Technology

Dear IMTS Visitor,

HIWIN Corporation would like welcome you to Chicago for IMTS 2016 and invites you to visit us at the show. We have a great selection of new products to display this year including our new RA605 6-axis robot.

HIWIN Corp is exhibiting in 2 locations this year. Our main booth is located in the East Hall - Motion, Drives and Automation Pavilion - **Booth 4757**

Our second booth is located in the lower North Hall - **Booth 425** where will display our new intelligent ballscrew technology.

HIWIN is very pleased to be an exhibitor at IMTS. We are looking forward meeting you and discussing any motion control needs you may have or just discussing the latest advancements in motion technology.

See you there!

Hiwin Corp. manufactures an extensive line of both linear motion components and complete positioning solutions.

With a goal of supplying superior quality at the most competitive prices, the company offers a variety of precision ground and rolled ballscrews, linear guideways, electric actuators, ballscrew and belt driven stages, and linear motors, with many fully integrated value-added features.

The company serves many major corporations in North America in a variety of industries including Machine Tools, Packaging, Aerospace, Energy and Medical and Biological Science and Semiconductor.

HIWIN is excited to announce the official North American debut of it new RA605 6-axis Robot at IMTS 2016.

The RA605 is a compact and agile 6-axis jointed-arm robot for precise assembly, complex machining and workpiece manipulating. Applications include: pick-and-place, handling, assembly, deburring, grinding and polishing.

Visit HIWIN **Booth 4757** for a demonstration.
