HIWIN Monthly Revenues Hit Record High In March

Taipei, Taiwan

Robot and motion control mechanical component maker HIWIN Technologies has reported record consolidated revenues of NT\$1.59 billion

(US\$51.85 million) for March 2017, increasing 37.11% from a year earlier.

For the first quarter of 2017, revenues totaled NT\$4.288 billion, increasing 42.54% from a year earlier.

With its order visibility already extending to the end of the second quarter, HIWIN is expected to see its revenues continue to grow robustly during the April-June period, according to industry sources.

The company's stock price edged up NT\$0.20 to finish at NT\$190.00 on the Taiwan Stock Exchange (TSE) during the April 10 session.
