See HIWIN's Gait Training System at the FIME 2015 Show

Elgin, IL

HIWIN Corp will be exhibiting its selection of motion control and automation products at the FIME 2015 Medical Trade Fair in Miami Beach Florida on August 5-7. FIME 2015 will be located at the Miami Beach Convo Center.

A featured product will be the RG-P100 Gait Training System available from HIWIN Mikrosystems. The RG-P100 electromechanical system provides all the essential features to carry out clinical gait training. The training system improves the walking ability in patients which suffer from neuromuscular disorders. This medical device provides a solution for gait rehabilitation therapy for out-patients as well as in-patients. The RG-P100 offers basic training modality to improve the training efficiency for non-ambulatory patients and ambulatory patients. The robotic gait orthoses assists in the walking movements of gait impaired patients caused by cerebral, spinal, neurogenic, muscular, osseous, or sarcopenia impairment.
